

ASSIGNMENT 2

Q1. How many ways are there to call a function in R?

There are 3 ways to call a function in R:

1. Calling with default argument

2. Calling a function by naming/assigning values to argument

3. Calling a function with no argument

Q2. Is the below statement true?

- The lazy evaluation of a function means, the argument is evaluated only if it is evaluated only if it is used inside the body of the function. **TRUE**

3. Mention true or false for below statements:

- Insights driven from descriptive analytics is not meaningful – **TRUE** (*Answer may be subjective based on type of analysis*)
- The number of values in each Elements of a list, should be equal - **FALSE**
- The datasets are not stored in memory of the computer using R - **TRUE**
- Data frames and matrices are two dimensional however the array is multidimensional- **TRUE**
